Nov 2022 – Dec 2022

- Completed 35 hands-on project.
- Finished bootcamp in 30 days.

## EXPERIENCE

---

### Software Engineer Intern | Accenture:

Dec 2022 – Jan 2023

- Proactively monitored servers and batch jobs daily to ensure everything is working as expected.
- Communicates with each team members for daily health checklist (DHC) report.
- Sends daily summary reports of servers and DHC to the CIO management team.

### QA Engineer Intern | CocoTech:

May 2022 – Oct 2022

- Created test cases and performed user testing for Looptify Android and IOS app as well as Looptify admin panel.
- Performed bug hunting in dev and prod environment and created tickets that were critical for the successful release of each builds.
- Made great use with tech platforms such as Slack to report bugs to software engineers and Jira in managing tickets.
- Praised by the front-end dev for finding a bug that he found weird.
- Was offered a part time job after my internship.

### Amazon Seller Support | Teleperformance:

May 2019 – Dec 2021

- Communicates with Amazon Sellers daily to handle their concerns.
- Excels in using Amazon's tools to fix seller's listing errors.
- Performs manual inventory reconciliation to check for missing and unreimbursed items.
- Experienced working under pressure and managed time efficiently by working part-time at night then college studies in the morning.

## PROJECTS

---

### [Portfolio Website](#) (Next.js, Tailwind CSS, Framer Motion, Vercel)

- My portfolio website. Inspired by the designed of Brittany Chiang.
- This is built with Next.js, Tailwind CSS, Framer Motion & Vercel.

### [Eductionery](#) (React.js, Firestore, Google O-auth, Redux Toolkit, Reactstrap, Firebase Hosting)

- A marketplace for stationery and educational materials. My capstone project inspired by Amazon.
- With admin panel, firebase authentication, searching & filtering, route protection for unauthenticated users, add/remove to cart, image upload, product suggestion.

### [Morales-Clinic](#) (ASP.net, MS SQL, Somee.com Hosting)

- Created an ASP.net web app to manage patient registration, consultation, immunization, billing and stored data to MS SQL DB.
- Utilized a MasterPage using vanilla CSS and Javascript.
- Published and deployed the web app to free online host Somee.com
